EC-Council - Certified Ethical Hacker v10

Code: CEHv10
Length: 5 days
URL: [View Details](#)

The world's most advanced ethical hacking course with 20 of the most current security domains an ethical hacker will want to know when planning to beef up the information security posture of their organization. In 20 comprehensive modules, the course covers over 270 attack technologies, commonly used by hackers.

Our security experts have designed over 140 labs with 60-minute real-time scenarios in the course to help you "live" through a attack as if it were real and provide you with access to over 2200 commonly used hacking tools to immerse you in the hacker world.

The goal of the course is to help you master an ethical hacking methodology that can be used in a penetration testing or ethical hacking situation. You walk out the door with ethical hacking skills that are highly in demand, as well as the globally recognized Certified Ethical Hacker certification!

- Certification exam voucher included

Skills Gained

Students going through CEH training will learn:

- Key issues plaguing the information security world, incident management process, and penetration testing
- Various types of footprinting, bootprinting tools, and countermeasures
- Network scanning techniques and scanning countermeasures
- Enumeration techniques and enumeration countermeasures
- System hacking methodology, steganography, steganalysis attacks, and covering tracks
- Different types of Trojans, Trojan analysis, and Trojan countermeasures
- Working of viruses, virus analysis, computer worms, malware analysis procedure, and countermeasures
- Packet sniffing techniques and how to defend against sniffing
- Social Engineering techniques, identity theft, and social engineering countermeasures
- DoS/DDoS attack techniques, botnets, DDoS attack tools, and DoS/DDoS countermeasures
- Session hijacking techniques and countermeasures
- Different types of webserver attacks, attack methodology, and countermeasures
- Different types of web application attacks, web application hacking methodology, and countermeasures

Cert Guide

Learn, prepare, and practice for exam success

A Certified Ethical Hacker is a skilled professional who understands and knows how to look for weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker, but in a lawful and legitimate manner to assess the security posture of a target system(s). The CEH credential certifies individuals in the specific network security discipline of Ethical Hacking from a vendor-neutral perspective. This is the world's most advanced certified ethical hacking course with 20 of the most current security domains any individual will ever want to know when they are planning to beef up the information security posture of their organization. In 20 comprehensive modules, the course covers 340 attack technologies, commonly used by hackers. What's new in the CEH v10? (Certified Ethical Hacker Certification) EC-Council has announced the CEH v10 eAAA the tenth edition of the popular Certified Ethical Hacker certification. Unveiled amongst other huge updates at the Scaling the unscalable mountain of cyber capability webinar, CEH v10 marks a new chapter for the certification as it aims to maintain its status as the world's top ethical hacking certification. The CEH dates back to 2003 and has been updated regularly to embrace evolving technologies. As a reminder, the CEH certification was last updated in 2015, with the launch of the CEH v9. This update increased the number of modules to 18 and introduced a greater focus on cloud computing. Alongside other EC-Council partners, Firebrand attended the announcement webinar to give our students their first look at these important updates. What's new in the CEH v10? EC-Council is continuing to update CEH to meet the demands of employers across the world. Here's what's new in the CEH v10: A module on the Internet of Things (IoT) security Upgraded vulnerability assessment material A focus on cloud attack vectors, AI and Machine Learning of the CEH practical in response to the growing threatening of IoT devices not guaranteed - such as Botnet Mirai's attack of 2017 - the CEH V10 will present a new duty focused on the Internet of Things Security (IoT). This duty will provide professionals with the necessary knowledge to test, deploy and manage the insurance of IoT devices. CEH's new version also introduces updated vulnerability assessment. Vulnerability assessment is a chistic element of the hacker life cycle and the V10 will increase the depth of vulnerability of applications in real world environments. Students cover the necessary tools to evaluate the systems, the tools that hackers use, and how to correct vulnerabilities. Professionals can expect an increased focus on emerging attacks, such as cloud technologies, and learning of mothers. Students find themselves studying and learning of mothers to perform vulnerabilities assessments, in an effort to defend themselves against malware attacks. The CEH V10 also will present to students the process of malware dwarf - the whole to determine the functionality, origin and impact of malware through reverse engineering. The new CEH Examination Maintains the same format as its predecessors; No Questions: 125 Test Duration: 4 Hours Test Format: ECC Exam, VUE Exam EXAM Prefix: 312-50 (ECC Exam), 312-50 (VUE) Laboratory tools for CEH V10: CEHV10 Mother - Pron 6 - CEHV10 Laboratory Requisites - Footprint Mother and Recognition of CEHV10 - Digitization Networks CEHV10 Ady e Ady e A e A e Module e A e e A e isoner ,A e Somentation System 'System' Ady e Ady e e e the Whale of the Whale of the Whale of the Whale of the Whale of the Whale of the Many of the manise of the homelessness of the dwarf of the dwarf of the dwarf of the dwarf of the mother.
